Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Examiner and Mr. Ahn discussed the final Office Action as based on Moezzi and in particular went over the "sensor subsystem" and "time indexing" limitations of claims 1, which Applicant's representative argued was not met by the applied reference. The Examiner disagreed, noting that at least for claim 1, the sensor subsystem as recited in the claim generates images, but that the images only later on are converted into the immersive panoramic image (i.e. the sensor system was interpreted to be a multi-camera configuration). But claim 36 clearly states this fact, and therefore, Moezzi alone failed to address this feature as it appears in the relevant claims. Additionally, the Applicant's representative pointed out that Moezzi was directed towards viewing live broadcasts, and not "surveillance" as in the claims. The Examiner strongly disagreed, noting that Moezzi discloses using the method for viewing "events" occurring in an environment and "logging" the events accordingly. The Examiner informed Mr. Ahn that this was sufficient to read upon the "surveillance" limitation, since no mention of surveillance for security purposes was mentioned. Lastly, Mr. Ahn discussed the "time indexing" limitation of the claims, and Examiner pointed out that the "associated temporal database" with the generated video (Moezzi: column 38, lines 30-40) read on the limitation, especially since entries are generated at the time of the event recordation (Moezzi: column 29, lines 20-33). Although, the Examiner conceded that Moezzi didn't address the multi-camera feature of the sensor sub-system, the Examiner pointed that that the current state of art already accounts for panoramic image generation using a sensor subsystem with such a configuration, see US Patents: 5,023,075, 5,703,604, and 6,141,034 all to McCutchen, and US Patent: 5,495,576 to Ritchey. Accordingly, the Examiner agreed to withdraw the finality of the last Office Action, and issue a subsequent Office Action based on a new grounds of rejection incorporating a rejection based on a combination of Moezzi and one of the pieces of art cited above. No reply by the Applicant is necessary at this time.
